Engineering News-Record

Serving The Entire Construction Industry

Index

. . . of editorial content

McGraw-Hill, Inc.

Read Before Using This Index

Every item appearing in ENGINEERING NEWS-RECORD is indexed with the exception of certain Briefs (such as Labor Briefs, Careers) and of Obituaries.

All articles are indexed **alphabetically** by subject. Under each heading entries are listed **chronologically.**

Many important headings are divided into sub-headings, e.g., BRIDGES–by states or countries; CITIES–by name; BUILDINGS–by type (churches, garages, etc.).

The second part of this index contains names of authors, personalities and companies. Here are listed the names of people who are the subject of articles; names of authors of by-lined articles and published letters; and names of firms about which articles were written. Individuals or firms merely mentioned in feature articles dealing with various construction projects are seldom indexed by their names.

Items that describe new materials and equipment, including Product Briefs, are indexed under the PRODUCTS heading, by manufacturer's name, in the third part of this index.

Entries concerning only particular projects or firms are not repeated under the general heading. For example, an article about the Smith Construction Co. appears only in the NAMES section of the Index and will not be found under the heading: CONTRACTORS. A news item about bonds issued for the New Jersey Turnpike will be listed in the New Jersey section of HIGHWAYS and will not be found under: CONSTRUCTION BUSINESS, or: ECONOMY, where general stories on bonds are listed.

See means that all entries on the subject will be found under another heading, thus: EROSION, **see:** SOIL

See also means that a related heading should also be checked, thus:
SEWAGE, **see also:** WATER POLLUTION

The following abbreviations and signs are used:
RC –– Reader Comment
CW –– Construction Week
WO –– Washington Observer
B –– Brief and Around the World
e –– Editorial
** –– Article with many illustrations
* –– Illustrated article (if asterisk precedes entry, reference is to a picture with caption only)

ENGINEERING NEWS-RECORD is published every Thursday. There are 25 or 26 issues in each half-yearly volume, covering January to June and July to December, starting with vol. 78 in 1917, when ENGINEERING NEWS and ENGINEERING RECORD joined forces under our present title.

If you would like any information about material that ENR has published, do not hesitate to make direct inquiry by mail or telephone to: Gabriella L. Turnay, McGraw-Hill Inc., 330 West 42nd Street, New York, N. Y., 10036, telephone (212) 971–3507.
